Hi Mary – I got this from Dunn so you may have already seen it. We noted it mentioned drinking water wells. We had been under the impression that ground water in the area wasn't to be used for DW as it's part of a SUPR clean-up site. Glenn had also thought the ground water wasn't good for drinking water just generally because of poor quality – irrespective of any potential contamination.

Do you happen to know if there are drinking water wells in that area?
